PROFESSIONAL SUMMARY

Motivated and reliable university student pursuing studies in Network and System Administration and Information Technology. I have experience providing IT support and cyber services in a university environment, with strong skills in data entry, computer applications, internet research, and customer assistance. I am detail-oriented, quick to learn new technologies, and committed to producing accurate, high-quality work. I am seeking opportunities as an AI Trainer, AI Data Annotator, or Data Entry Clerk where I can apply my technical knowledge while continuing to grow professionally.

EDUCATION

Kibabii University
Diploma in Network and System Administration & Degree in Information Technology
2024 – 2027 (Expected Completion)

Relevant coursework includes:

- Linux Systems Administration
- Computer Networks
- Programming Fundamentals
- Database Systems
- Information Security
- System Administration

WORK EXPERIENCE

IT Assistant (Cyber Services)
Kibabii University Cyber Services
2024 – Present

Responsibilities

- Assisted students with printing, scanning, photocopying, and other computer-related services.
- Provided technical support for software and hardware issues.
- Helped maintain computer workstations and peripherals.
- Assisted students in accessing university online services.
- Performed accurate data entry and document preparation.
- Maintained confidentiality while handling student information.
- Worked with staff and students to resolve basic IT problems efficiently.

TECHNICAL SKILLS

- Microsoft Word
- Microsoft Excel
- Google Docs
- Google Sheets
- Data Entry
- Internet Research
- AI Evaluation
- Linux Administration
- Programming Fundamentals
- Computer Troubleshooting
- Website Development (Basic)
- Database Fundamentals
- Time Management
- Communication
- Teamwork
- Customer Service
- Problem Solving

ACADEMIC PROJECTS

Linux Server Installation and Configuration

Installed and configured a Linux server in a practical learning environment. Performed user account management, file permissions, package installation, networking configuration, and basic system administration tasks.

Website Development Project

Designed and developed a basic website as part of coursework using HTML, CSS, and introductory web development concepts, focusing on usability and responsive design.

Research Project

Participated in an academic research project involving information gathering, literature review, data organization, and report writing using credible online and library sources.

Programming Project

Developed small software applications to solve simple computing problems while practicing programming concepts such as variables, loops, functions, and conditional statements.

Data Analysis Project

Collected, organized, cleaned, and analyzed sample datasets using spreadsheet tools. Created tables, charts, and summaries to present findings clearly and support decision-making.

LANGUAGES

- English – Fluent
- Swahili – Expert
- French – Beginner

CERTIFICATIONS

Currently pursuing professional certifications to strengthen technical and AI-related skills.

ACHIEVEMENTS

- Recognized for strong academic performance in Information Technology coursework.
- Consistently demonstrates reliability, teamwork, and commitment during practical IT assignments.

ADDITIONAL INFORMATION

- Fast learner
- Reliable internet connection
- Own laptop
- Available full-time or part-time
- Willing to work night shifts

- Willing to learn new software
- Strong attention to detail
- Able to work independently and as part of a team

CAREER OBJECTIVE

To secure an opportunity as an AI Trainer, AI Data Annotator, or Data Entry Clerk where I can apply my technical knowledge, analytical skills, and commitment to accuracy while gaining valuable industry experience and contributing to organizational success.
